

offices ■ **accountancy** ■ technology

We provide an array of traditional accountancy services to resident and non resident clients including:

- Management accounting (monthly / quarterly)
- Financial accounting (sole traders, partnerships, LLP's & limited companies)
- Payroll
- Taxation services (personal & corporate)
- Full outsourcing of accounts function
- Book-keeping and VAT
- Forecasting

We work with all types of businesses, from sole traders to limited companies. We cater for all types of business – service, retail, property, manufacturing and farming to name a few.

Although we have a large client base in the local area, we do have clients spread all over the country. Very often, when a client relocates their business they often want to retain our services. In most cases this is possible as we are adaptable.

Originally known as Wetherby Book-keeping and Accounting Services, the business was founded in December 1989. Originally based in the centre of Wetherby, we moved in to Boston House Business Centre when it opened in 2004.

Our founding partner, Patricia Norman set up on her own but was quickly joined her son David in 1991. Our tax partner Andrew Johnson joined in 1994.

Customer service is very important to us, and a large number of our clients have been with us for many years. Some date back to 1989. We have a great team of people working for us and the fact that our core management team has been together for 15 years say something about us a business.
